

ABSTRACT OF THE DISCLOSURE

A pants garment has a pair of thigh leg members for covering the thigh area of a wearer. A front thigh elastic band member is provided substantially at a front side of each of the thigh leg members and extends obliquely from an upper front portion to a lower front portion of each thigh leg member. A back thigh elastic band member is provided substantially at a back side of each of the thigh leg members and extends obliquely from an upper back portion to a lower back portion of each thigh leg member. The garment also has a front and back crus elastic band members extending obliquely on crus leg members, which cover the crus areas of the wearer.
